Education

Auburn University (2021 - 2025)- Auburn, AL
Bachelor's degree in Computer Science
- GPA 3.0/4.0

Relevant coursework

Digital Logic Circuits

Characterization of computer science data structures and algorithms in terms of sets and relations, functions, recurrence relations. Use of propositional and predicate calculus to describe algorithms. Proving correctness and running time bounds for algorithms by induction and structural induction.

Discrete Structures

Characterization of computer science data structures and algorithms in terms of sets and relations, functions, recurrence relations. Use of propositional and predicate calculus to describe algorithms. Proving correctness and running time bounds for algorithms by induction and structural induction.

Related Experience

Onyx Digital Farms - Birmingham, AL
Internship (May 2022 - August 2022)
- Assembled liquid immersion Mining Using 24 ANT Miners
- Assemble 5 GPU mining rigs and over saw profitability of them
- Maintained warehouse mining shelfs of over 200 miners.

Technical Skills

Programming Languages: Python, Java, C++, HTML, CSS
Certifications: Microsoft Word, MIcrosoft Powerpoint, Microsoft Excel
Operating systems and software knowledge includes: Linux, Hive OS, BTC Tools, Arduino, Raspberry PI, Unity, Swift UI
